About this Guide

The *Tool and Equipment Rental Guide* is a comprehensive, current guide to cost recovery for equipment used by mechanical contractors. The rates in this guide are intended as guidelines paralleling amounts an equipment owner should charge during rental or contractual periods to recover equipment-related costs on a single-shift (8-hour) basis.

These rates are derived from cost formulas and data developed by EquipmentWatch and from analytic methods used in the construction industry. Generally, these methods consider purchase price, depreciation, maintenance and overhaul costs, indirect equipment costs, and average annual use hours. Specific market conditions, such as local supply and demand, are not considered in these calculations. **These rates are not a tabulation of rates being charged nationally.** They do not reflect rates charged by rental companies except by coincidence. Recognizing that costs may vary considerably from state to state, a [Regional Rate Adjustment Table](#) is provided.

The publication of these rates is not intended to influence the equipment rental market as a whole. To enter into agreement, combination, understanding, or action with any person or party with intent to establish rental rates at specific levels in this or any other publication may constitute a violation of Fair Trade Practices and be subject to prosecution.

This publication is designed to provide accurate and authoritative information in regard to the subject matter covered. It is sold with the understanding that the publisher is not engaged in rendering legal or accounting services. While all efforts have been made to assure total accuracy, the variable nature of the information and informational sources precludes any warranties of specific accuracy in any specific instance.

Rate Structure: Definitions and Methodology

Rental rates in this guide are based on ownership and operating costs for contractor-owned equipment. The term “rental” does not refer to third-party contracts for the use of equipment. Profit, project overhead, and general company overhead costs such as office facilities and supplies are *not* included in the rates shown in this guide.

Ownership Costs

- a. *Depreciation Costs.* Depreciation in this guide is a straight line, even accrual of funds over an established economic life to offset the original purchase price of a machine, tool, or any other piece of equipment. As applied in this context, it is not to be confused with other methods of determining depreciation for taxation or other accounting purposes.
- b. *Indirect Equipment Costs.* Allowances are made for indirect costs that result directly from equipment ownership. These costs may include such costs as normal risk insurance, property taxes, mechanics' and administrative supervision, storage, licenses, and record keeping costs.
- c. *Cost of Facilities Capital.* Cost of facilities capital (CFC), which is similar to but not exactly the same as interest charges, is an allowance for the cost of money invested in equipment, whether the equipment is purchased in cash or financed over time.
- d. *Major Overhaul.* The ownership rates in this guide include an allowance for major overhaul costs necessary to keep a machine functional throughout its economic life. This allowance covers the periodic rebuilding of engines, motors, transmissions, undercarriages, and other major equipment components.

The life-cycle ownership costs—depreciation, indirect costs, cost of facilities capital, and major overhaul—are annualized and then adjusted to reflect an average annual working season to obtain a monthly rental rate. Weekly and daily rates are then derived from the monthly rental rate. Rates for shorter use periods are increased to account for lost availability and productivity during shorter use periods. The weekly rates shown in this guide are 28 percent of the monthly rate; the daily rates are 25 percent of the weekly rate.

Overtime Guide

An industry practice in calculating rental rates for periods in excess of the base rate used for the job duration (daily, weekly, or monthly) is to use 1/8 of the daily rate, 1/40 of the weekly rate, or 1/176 of the monthly rate for each hour in excess of the base, but short of the next longer base duration.

Operating Costs

Operating costs include the following Items:

- a. The cost of labor and parts needed for routine, daily servicing of the equipment. This includes repairing and/or replacing small components such as pumps, carburetors, injectors, belts, filters, gaskets, and worn lines.
- b. The cost of operating expendables. These include fuel, computed in accordance with horsepower, average load factors, and the price of fuel; lubrications, including filters, oil, and grease, as well as the labor and the lube truck involved in lubrication; tires; and ground engaging components, including pads, blades, bucket teeth, etc. Tire costs are calculated by average tire life factors and take into consideration typical discounts from list prices. Electricity costs (where applicable) are calculated according to generally accepted duty cycles for the total motor load.
- c. The cost of extraordinary operating expendables may not be included in all operating expenses. Certain ground engaging components, such as hammer and drill bits, drill steel, augers, saw blades, and tooth-bits, are normally excluded from the operating costs because of their highly variable wear patterns. It is recommended that these costs be recovered separately. A list of [typical expendable items](#) is provided.

Operator's wages are not included in the operating costs.

Trade Names, where used, are for descriptive purposes only. Please note that where manufacturer's names and numbers are listed, it is only for better identification of the style and capacity of the equipment, and "equal" may be inferred.

Table of Contents

Section 1: Air Tools	1
A. Air Compressors	
B. Air Tool Accessories	
C. Blow Pipe	
D. Chipping Hammers	
E. Clay Diggers	
F. Grinders & Sharpeners	
G. Hoses	
H. Impact Wrenches	
I. Jackhammers/Rock Drills	
J. Line Oiler	
K. Movers, Air	
L. Nailers	
M. Rammers/Tampers	
N. Scabblers	
O. Scalers	
Section 2: Benders	3
A. Electric	
B. Hydraulic	
C. Mechanical	
D. PVC	
E. Ironworkers	
Section 3: Beveling Machine, Flamecut	4
Section 4: Blowers/Fans	4
A. Blowers	
B. Ducts, Air Delivery	
C. Fans, Coolers	
D. Fans, Exhaust	
E. Manhole Ventilation Blower	
F. Portable Blower/Vacuum	
Section 5: Breakers, Pavement	5
A. Air	

TOOL AND EQUIPMENT RENTAL GUIDE

- B. Electric
- C. Gas
- D. Hydraulic

Section 6: Compaction Equipment.....5

- A. Plate Compactors, Vibratory, Gas
- B. Plate Compactors, Vibratory, Diesel
- C. Tampers, Hand-Held, Gas

Section 7: Conductor Stringing6

- A. Cable Puller with Reel Winder
- B. Single Puller
- C. Vacuum Fishing System

Section 8: Conveyors.....6

- A. Belt, Portable
- B. Double Chain Elevator, Portable
- C. Gravity, Skate Wheel

Section 9: Copper Handling Tools.....6

- A. Cleaning Machine, Electric
- B. Cutting Machine, Electric
- C. ProPress Machines
- D. Strap Bender
- E. Strapmaster/Bohn Combi

Section 10: Cutters.....7

- A. Angle Iron
- B. Bolt or Reinforcing Rod
- C. Cable
- D. Glass
- E. Metal Shears, Electric
- F. Nibblers, Electric
- G. Nut Splitter, Hydraulic
- H. Pipe & Conduit
- I. Roller
- J. Saran
- K. Soil Pipe

Appendix II

Typical Small Tools

These items are a definite item of cost on a job, and it is the usual practice in our industry to charge these items to the cost of a job on the basis of a set percentage of all field labor cost.

(Field labor cost includes payroll taxes and insurance and fringes.)

Adjustable Wrenches	Packing Irons
Asbestos Blankets	Picks
Axes	Pipe Markers
Bars (Claw, Crow, Pinch, Wrecking)	Pliers
Boring Machines (Hand)	Ratchets
Braces	Rollers
Bull Points	Saws (Hand)
Cable Grips	Screwdrivers
Calipers	Shackles
Carpenter Levels	Shovels
Caulking Irons	Sledges
Clamps (Carpenters, Jewel, Welding, Cable)	Slings (Rope)
Dial Thermometer	Snips
Dolly (Wood and Metal)	Squares
Flashlights	Tampers (Hand)
Gas Buggies	Test Plugs (Hand)
Hammers (All Types)	Test Pumps (Hand)
Horses (Mason)	Tapes (Steel)
Johnson Bars	Trowels
Lanterns	Tubs (Mortar & Line)
Mauls	Welding Shields
Oil Cans	

While this list is by no means complete, it is intended to give a representative cross section of the type of items which may be classified as "Small Tools."

Appendix III

Typical Expendable Items

It is the general practice of our industry to charge these items at cost to a job as a part of the material cost of the job, or as items of direct job expense.

Abrasive Cutoff Discs	Other Inert Test Gases
Acetylene	Other Lubricants
Argon	Other Printed Forms
Brushes (Paint, Wire, Fitting)	Other Solvents
Chisels	Oxygen
Cleaning Fluids	Paste Brushes
Clean-out Plugs	Pipe Cutter Wheels
Cutting Oil & Paste	Pipe Dies
Cutting & Welding Tips	Pipe Joint Compounds
Drill Bits (Diamond & Steel)	Propane
Emery Cloth	Rod Dies
Emery Wheels	Sand Cloth
Files	Sand Paper
Flux	Solder
Foul Weather Gear	Star Drills
Gloves, Soapstone	Time Charge Tickets
Grinding Wheels	Tip, Cutting
Hacksaw Blades	Tip Cleaners
Hole Saw	Tip, Welding
Kerosene	Tool Handles
Material Charge Tickets	Tungsten Tips
Naphthalene	Twist Drills
Other Abrasives	Welding Hood Lens
Other Drill Bits	Welding Rod
Other Fuels	Wiping Cloths & Rags
Other Inert Shield Gases	Wire Brushes

While this list is by no means complete, it is intended to give a representative cross section of the type of items which may be classified as "Expendable Items."

Appendix IV

How to Adjust for Fuel Rate Increases That May Occur After the Publication of the *Tool & Equipment Rental Guide*

During the production of the *Tool and Equipment Rental Guide* in July of 2020, operating costs were calculated using a price of \$2.17 per gallon for gasoline and \$2.40 per gallon for diesel. Because each equipment category, and even each size class within an equipment category has its own unique fuel consumption factor, it is not possible to give one single percentage of the fuel allocation in each of the Rental Guide rates.

As a tool to aid users in adjusting these rates to account for increases in the cost of gasoline and diesel fuel, we have prepared the following table to indicate approximately what percent of the total *Tool and Equipment Rental Guide* rates accounts for fuel.

To adjust the rate to account for a different fuel cost, first determine the percent increase of your current fuel costs over the cost we used producing the rate.

For example, if your current cost of diesel fuel is \$4.50 per gallon, then $4.50/3.01 = 1.50$, a 50% increase.

Next, multiply this percentage by the percentage indicated on the chart.

For example, the average percentage for Air Compressors is 62.5%. Therefore, $.625 \times .50 = .3125$, or 31.25%. This is the amount to increase the published rate to reflect a fuel cost of \$4.50 per gallon.

Please note: The average fuel percentages are an average over all models and sizes in an entire equipment type. The percentage for a particular piece of equipment may lie anywhere within the range. In many cases, the minimum range reflects the cost for diesel machines, and the maximum range reflects the cost for a gas-powered machine. You are therefore encouraged to take size, model, and type of fuel into account when making your adjustments.

Equipment Type	Minimum	Maximum	Average	Diesel: \$2.40	Gas: \$2.17
Air Compressors, Rotary Screw, Portable	45%	80%	62.5%		
Breakers, Pavement	1%	48%	24.5%		
Plate Compactors, Vibratory	31%	48%	39.5%
